

Răzvan Ioan Bibart

Information Security Engineer | Security Architecture · Automation

rbibart@razvanbibart.com · Timișoara, Romania (Remote) · razvanbibart.com

PROFESSIONAL SUMMARY

Six years in at Bitdefender, working across security architecture, incident response, vulnerability management, security automation, phishing & awareness, and a lot more. A lot of my work right now is on AI agents in security operations and building internal tools that get adopted across the company.

CORE SKILLS

Security: Incident Response & Tabletops (IRM role), Phishing Simulation & Awareness, Security Architecture, DLP, BCDR Planning, OSINT, OWASP Top 10

AI Tooling: AI agents and LLMs in daily security work for automation, drafting playbooks, log triage, scripting

Identity & Zero Trust: Active Directory, Entra ID, MFA enforcement, privileged access reviews, IAM policies

Cloud & Tooling: AWS, Azure, GCP, Cloudflare, Microsoft 365, Exchange, Intune, Palo Alto, Splunk (SIEM), GravityZone (EDR/AV)

Scripting & Dev: Python, PowerShell, Bash, SQL, C#, Full-Stack web development

Infrastructure & Virtualization: Hyper-V, VMware, Proxmox

WORK EXPERIENCE

Information Security Engineer | Bitdefender Jan 2021 – Present

- Maintain security architecture across cloud and on-prem infrastructure: hardening, lifecycle upgrades, and reviews of critical configurations.
- Run major security incidents as IRM, covering containment, stakeholder comms, and post-mortems that feed BCDR planning. Plan and facilitate tabletop exercises with engineering and business teams.
- Use AI agents and LLMs in daily security work to automate recurring tasks, draft playbooks, and accelerate log triage and scripting.
- Own the phishing simulation program end-to-end: supporting infrastructure, templates, execution, and funnel analysis from email open through credential submission. Tune campaigns based on real user behavior.
- Built and maintain an in-house security awareness platform used across the organization for trainings and quizzes, replacing reliance on third-party tooling.
- Built a live incident status page used internally during major incidents to track active threats, response actions, and ownership across teams; the platform uses AI agents to summarize updates and surface key details in real time.
- Audit team procedures and workflows against internal policy and compliance standards; advise on remediation.
- Operate IAM and Zero Trust controls: Active Directory and Entra ID configuration, MFA enforcement, and privileged access reviews.
- OSINT monitoring for company exposure on the public internet: assets, leaked credentials, brand impersonation, threat-actor chatter.
- Build internal tooling and scripts for recurring checks, alerting, and reporting used by the InfoSec team.

System Administrator | **Bitdefender** *Sep 2019 – Jan 2021*

- Provided system administration services for Windows and Linux infrastructure and development systems; maintained required configuration profiles and applied changes driven by production environment evolution.
- Performed troubleshooting on Windows and Linux systems to identify and resolve hardware, software, and networking issues at both OS and application levels.
- Executed failure recovery procedures for managed systems and applications; ensured operational procedures stayed up to date and were effectively applied.
- Provided technical support for internal users and reported weekly on completed and ongoing project activities.

IT System Engineer | **Elettrosud Group** *2015 – Sep 2019*

- Owned installation, configuration, maintenance, and reliable operation of systems, software, hardware, and networks; managed upgrades to new releases and models.
- Administered and trained users on Gamma Enterprise (ERP).
- Automated common infrastructure and platform administration tasks via scripts and tooling.
- Designed, installed, and configured servers, network devices, and firewalls.
- Provided training, guidance, and support to end-users on operations, policies, and procedures.

IT Teacher | **Liceul Teoretic Pâncota** *2009 – 2014*

- Taught informatics curriculum; mentored students in programming fundamentals.

EDUCATION

M.Sc. Informatics | **Aurel Vlaicu University, Arad** *2012 – 2014*

B.Sc. Informatics | **Aurel Vlaicu University, Arad** *2009 – 2012*

LANGUAGES

Romanian (native) **English** (professional) **Italian** (conversational)
